

Participant Guide

Whether you ride, run, walk, work, or move with a crew, KETRACK lets the people running your event or team see you live and reach you hands-free. Signing up takes seconds — you scan one code and you're in. No account, no password.

1 • Install the app

1. Install the **KETRACK** app (your organizer will send a TestFlight invite or App Store link).
2. Open it and allow **location** when asked — that's how you appear on the map.

2 • Enroll (one time)

1. Tap **Enroll with a code / QR** on the start screen.
2. Tap **Scan QR** and point your phone at the organizer's QR — or type the short code they gave you.
3. That's it: your phone is enrolled and remembers you.

Tip No QR handy? Just type the code the organizer texts or reads to you — same result.

3 • Start your activity

1. Pick your activity from the list, enter your name if it isn't already there, and tap **Start**.
2. Move normally — you'll show up live on the organizer's board with your route drawing behind you.

4 • During and after

1. Messages from the organizer are **read aloud** automatically — keep moving, no need to look.
2. Tap **Pause** to stop sharing briefly, **Stop** when you're done.

Your location is only shared with your group while your activity is running. Stop it and sharing stops. ketrack.com
